

NIT-Lab Remote Access Procedure

To connect to NIT-Lab via remote access VNC® Viewer tool is used. The tool is free, and no licence is required.

Remote access using VNC® Viewer can be configured in three easy steps:

- 1) Download and install [VNC® Viewer](#) desktop tool
- 2) Create your [RealVNC](#) account
 - › Required information:
 - › Email address: use business email, i.e. the same email used for [Canvas](#)
 - › Password:
 - › First name:
 - › Last name:
 - › I plan to use VNC Connect for: personal use
 - › Country or region:
- 3) Sing-in to VNC Viewer desktop application with your business email address
 - › After sing-in inside the application a NIT-Lab PC shall be available to connect

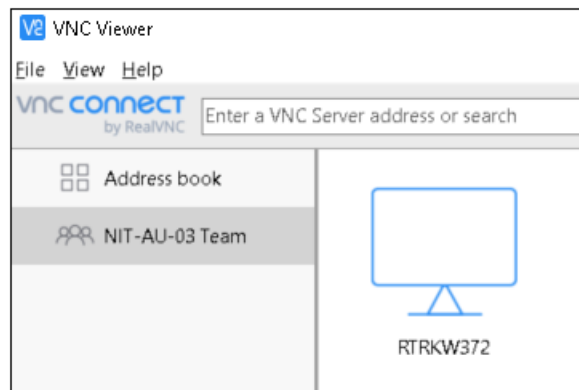

Figure 1 – Example of available NIT-Lab PC inside VNC Viewer desktop application

For login to a NIT-Lab PC use the following credentials:

Username: nituser

Password: TMDlab7

The same credentials are used for Windows user login.
